

**SOFTWARE ENGINEER II/III**  
Information Technology Department  
County of San Luis Obispo  
**\$69,284 – 93,516 annually DOE/DOQ**

San Luis Obispo (SLO) County, Information Technology Department, is looking for experienced Software Engineers to join our development team. As a software engineer you will be a key contributor delivering new product features and functionality to existing applications and develop new web-based and mobile applications to wow customers.

### **THE DEPARTMENT**

San Luis Obispo County Information Technology Department (ITD) offers an exciting, fast-paced environment where exceptional performance is encouraged and rewarded. ITD supports the countywide technology infrastructure and approximately 2,500 users. We have a centralized project management team, as well as software and network engineer specialists. This centralized career opportunity provides candidates the exposure of working with all our departments; essentially 23 different industries. The County supports a work-life balance, and provides a generous pension and an outstanding community.

### **The Ideal Candidate**

We are looking for creative and innovative software engineers who can contribute to the County by applying their skills in business systems and software engineering. ***Ideal Candidates should:***

- Have a great attitude and a “get it done” mind set
- Have a strong sense of ownership of the applications and services you develop/maintain
- Have a high degree of self-motivation
- Have a desire to participate and learn new technology
- Have an education in computer science (BS/MS) or related experience
- Be detail-oriented, with strong analytical, problem-solving, and troubleshooting skills
- Have the ability to plan and execute work both independently and as a team member
- Have the ability to prioritize and manage several tasks at once
- Have good communication and written skills for meeting with customers, peers and managers

### **And, possess experience in some, or all, of the following:**

- Excellent knowledge and work experience on **designing web-based applications**
- HTML5 and **Angular** frameworks in a Microsoft Server Environment
- **SQL Server Analysis Services** and SQL Reporting Services
- **Microsoft Visual Studio**, ASP.NET, web services, XML, **C#** or VB.NET, and **Angular**
- JavaScript, jQuery, JSON, RESTful web APIs and SOAP
- Developing and maintaining queries and stored procedures within SQL Server Management Studio
- IIS Web Application Management, configuration, setup, deployment, troubleshooting
- Understanding of agile software engineering processes and methodologies
- Knowledge of Web application security
